<https://intersell.pl/gb/1011-glass-frp-remote-control-for-cable-overwing-9mm-diameter-300m-zolty.html>

Manufacturer: Telcoline

Referention number: Pil-FRP-9-300m

### Full product description

**Cable-dragging remote control** made of FRP fiberglass (fiber-reinforced polymer).

It is used to drag cables in hard-to-reach places (e.g. under roads or between teletechnical wells, suspended ceilings). In addition, it can be used for placing cables in curtain pipes, as well as because of its high robustness, it is great for obstructing or cleaning all kinds of pipes, sewers or fiber optic culverts.

### Features:

- High elastic fibre with guide head,
- Made in technology that increases its resistance to tearing and bending,
- Covered with yellow polyethylene - the fiber is clearly visible, protected from damage and easy to drive, thanks to reduced friction,
- Powder-coated frame with drum lock brake and hole ("eyelet") for easy handling of the fibre,
- Compact design with wheels for easy storage, transport and use.

### SPECIFICATION

Technical parameters	
Type of fibre	Mmf Coated with polyethylene (PE material) yellow (for protective and slip-improving purposes)
Length [m]	300
Diameter [mm]	9
Dimensions [mm]	1150 x 500 x 1250
Wheel diameter [mm]	200
Weight [kg]	approx. 43 (including rack)

Frame	Color: blue (powder coated)
