<https://intersell.pl/gb/1130-cable-drop-holder-or-flat-2-5mm-detachable-handle.html>

Manufacturer: Telcoline

Referention number: TEL-I-FISH-U

Information:

For round cables from 2 to 5mm and flat cables up to 2x5mm. It is used to provide adequate tension of the installation, the bending radius of the cable or the point hanging of the cable between the spans. It has a detachable handle.

Full product description

Drop cable holder Telcoline 2.5mm detachable handle

The DROP cable extraction holder is used in overhead network designs based on flat or round drop cables. Its task is to provide adequate stress in the installation or bending radius for the cable when we want to make a branch e.g. for the customer. They can also be used to point the cable between spans, so that the tension of the fibers will be reduced, eliminating the chances of damage.

The handle is made of plastic, m.in resistant to moisture and UV. The installation is tool-free, the mount is based on an openable handle (eliminates the need for a carabiner)

Product specification

Technical parameters	
Material	Plastic
Resistance to	Stretching: up to 900N UV radiation, moisture
Destiny	Round cables from 2 to 5mm Flat cables up to 2x5mm
Destiny	Overhead installations
General parameters	
Dimensions (length x width) [mm]	Extraction: 76 x 48 Handle: 65 x 27
Weight [kg]	0,05
