Manufacturer: InterOpto

Referention number: IO-STR11

Full product description

Pocket slitter for tubes (fiber buffers) is an efficient and indispensable tool when working with fiber optic cable ends. It allows you to easily cut the PVC jacket and separate it into two separate parts. It is suitable for both field and plant applications, and the precision and innovation of this tool saves time.

Technical data:

- Weight: 35g,
- Size: 50 x 40 x 20mm,
- Cable dimensions: 1.5 - 1.9mm, 2.0 - 2.4mm, 2.5 - 2.9mm, 3.0 - 3.3mm.

Manual:

- Select the appropriate groove, depending on the diameter of the cable to be notched,
- Insert the cable into the groove, paying attention to the position of the blade and the length of the cable
- Close the slitter and hold it firmly with one hand, then pull the cord with the other hand,
- Check the cable intersection. On the coat there should be two cracks, which completely separate it into two parts.
