Manufacturer: ShinewayTech

Referention number: OCI-20B

Full product description

OCI-20B Optical Connector Inspector

- U Compatible with various connectors
- U Dual channel video input (microscope) for easy viewing of male / female connectors
- U Extended display on external monitor
- U Audio & video recording
- U Multimedia playback
- U Direct read / write flash disk
- U Large storage: 128MB internal memory, SD card up to 16GB
- U Data transfer via USB2.0
- U Internal battery for 9 hours continuous operation
- U Compact & lightweight

OCI-20B is a portable optical fiber connector inspector for checking fiber and connector end-face cleanliness, ideal for bench top and fiber optic network installation technicians to eliminate error caused by poor quality or improper cleaning.

OCI-20B offers excellent viewing on connector / fiber end-face and has a unique feature to record and save image / video of fiber end-face all by itself, with no computer or any external devices needed, which is the only type of its kind in the industry.

Specifications

Model	OCI-20B
Field of Vision	300 × 280μm
Zoom	Scope: 600X (12X Optical zoom); Display: 200X
Resolution	0.5μm
Focus	Manual adjustment
Sensor	1 / 3IN CCD, black & white
Display	2.5 inch LCD (960 × 240)
Video / Audio Recording	Yes (Video with timing display)
Video Input	Dual channels: CH1 / CH2 (2 ports)
Audio Output	Earphone jack: L 20mW + R 20mW [160] (Max volume)
